The Flagship F1-500 Aircraft Tractor was designed in Australia for both pushback and extended towing of aircraft up to 600 Tonnes (A380-800).

Drop-in ballast in the F1-500 easily transforms the tractor from a standard 54 Tonnes for A340 & B747 up to 70 Tonnes for A380-800 with no obstruction to the operators' line-of-sight.

With power to spare the F1-500 features a 360kW (483hp) Diesel Engine with 1990 Nm (1468 Ft/lbs) of Torque. This modern styled, unique tractor is built on our exclusive integral perimeter frame chassis. This chassis is guaranteed for life.

The F1-500 is easy-to-maintain with simple lift off covers surrounding the oversized engine bay and easy-to operate with a fully enclosed cabin, extra-wide doors and optional hot/cold air-conditioning.
