

ATA 9 TOWING AND TAXIING

Aircraft pitching-towing equipment

This equipment is used for towing aircrafts without a towbar and raise the nose of the aircraft in order to use hangars which gauge door was lower than the height of the VTP.

Aircraft Pitching Towing Jack

This device also performs the operation of lifting the nose of the plane, but requires a tractor to move the equipment and aircraft.

Towbars

Great variety of towbars, developed in specific geometries attending to the customer requirements.
